Performance Advantages of Dyna-Tek Mold Release Products:

- Requires less mechanical action to release part
- Longer lasting; can significantly increase pulls between coats depending on material and mold configuration
- Reduce tool cleanup time by 75%+
- Reduce tool turnaround time by 50%+
- Improve part surface quality and reduced risk of damage while removing part from mold
- Improved downstream efficiency due to zero transfer of free silicones to molded part surface
- High heat resistant > 1000 °F
- Will not change tolerance of tool nor part
- Increased tool wear life and reduced tool maintenance due to easy part release and reduced tool cleaning
